## Roof-Mount Mast Anchor

You can install this mast anchor at the peak of any roof or on a flat roof. The special swivel mast sleeve lets you attach the mast to the mast anchor while the mast is lying flat on the roof. Then, you can raise the mast (and antenna) into position. This reduces the risk of accidents caused by trying to hold the mast upright while performing other tasks.

### ASSEMBLE THE MAST ANCHOR

Insert the supplied U-bolt through the two holes in the smaller section of one support, the slots in the mast sleeve, and the two holes in the smaller section of the other support. Then loosely attach a supplied lock washer and nut to each leg of the U-bolt.

## ATTACH THE MAST ANCHOR TO THE ROOF

With the sleeve straight up and down, place the mast anchor at the peak of the roof or anywhere on a flat roof. Then attach the supports to the roof, using four lag bolts (RadioShack Cat. No. 15-833) on each side. Be sure the bolts are anchored in solid roof timbers.

## ATTACH THE MAST TO THE SLEEVE

1. Pull the sleeve up and lay it on its side. You might have to loosen the nuts on the U-bolt.
2. With the mast horizontal, insert it into the sleeve until the mast touches the U-bolt.

2

3. Thread the two remaining supplied nuts all the way onto the supplied bolts so that the nuts are against the heads of the bolts.
4. Insert the bolts into the holes in the sleeve until they hold the mast firmly in place.
5. Tighten the nuts against the sleeve to lock the bolts in place.

## RAISE THE MAST

1. Attach the antenna to the mast as described in the antenna's installation instructions.
2. Using both hands, raise the mast (and antenna) to a vertical position. Then, lower the mast so that the lower slot in the mast sleeve slides over the U-bolt.
3. Securely tighten the nuts on the U-bolt.

**Note:** Install guy wires if you are using a mast longer than five feet. Visit your local RadioShack store for the necessary materials and instructions.
